Younes Alhallack

Full-Stack Mobile Developer | Flutter · Node.js · NestJS · Payment Systems

Damascus, Syria | +963 937 877 116 | younesalhallack@gmail.com | github.com/younesalhallack | younesportfolio-omega.vercel.app

PROFILE

Full-stack mobile developer who builds the Flutter app and the Node.js/NestJS backend behind it, with local (ISAR, SQLite) and cloud (MySQL, Firebase) databases. 2 years of hands-on Flutter work using Clean Architecture and Riverpod, on top of 8 years in electronic payments: switch and gateway integration, daily reconciliation, and national payment network infrastructure. Supervised Q Pay, a Flutter payment-request app, through to the licensing stage. Open to full-time remote roles and freelance projects.

TECHNICAL SKILLS

Mobile: Flutter, Dart, Riverpod, GetX, Provider, Clean Architecture, OOP, responsive UI

Backend: Node.js, NestJS, Express, REST APIs

Databases: MySQL, MongoDB, Firebase, ISAR, SQLite

Payments Domain: Payment gateway and switch integration, EOD reconciliation and settlement, security and permission review

Tools: Git/GitHub, Linux

PROJECTS

Rafiq — AI Goal & Task Planner (Flutter) | *github.com/younesalhallack/Rafiq*

- Users set a goal and an AI engine (Grok API) generates a plan with tasks, priorities and due dates, tracked by percentage progress, plus an assistant chat.
- Clean Architecture with separate data, domain and presentation layers. Stack: Flutter, Riverpod, ISAR, MySQL.

Bill App — Multi-Currency Expense Manager (Flutter) | *github.com/younesalhallack/bills_app*

- Income and expense tracking in SYP, USD and EUR with category reports, monthly comparison and Google Drive backup.
- Stack: Flutter, Riverpod, ISAR, Clean Architecture.

Clear-X — Reconciliation Platform (React, NestJS) | *github.com/younesalhallack/clearx*

- Upload transactions and a bank statement; the system matches them and flags what does not match. Built from my day-to-day reconciliation work in payments.

Dukan — Small-Shop Manager (Flutter) | *github.com/younesalhallack/dukan_special_app*

- Mobile app for a small shop: inventory, invoices, and sales and profit reports, stored locally with SQLite.

Demos, screenshots and source for all projects: younesportfolio-omega.vercel.app. All projects are self-directed and open-source; not yet published to app stores.

PROFESSIONAL EXPERIENCE

E-Payment Manager — Mobile App Technical Supervisor **Mar 2023 – Oct 2025**

Pick&Click | Damascus, Syria

- Supervised Q Pay, a Flutter payment-request app, directing an external development team from architecture through to the licensing stage, with REST API connection to payment gateway and switch infrastructure.
- Owned delivery of a payment gateway and loyalty program connecting 4 banks and 5 merchants (company closed before commercial launch).
- Set testing standards, led vulnerability identification and enforced permission controls for the mobile app.
- Directed daily EOD reconciliation, matching internal records against bank files.

Head of System Security & Infrastructure **May 2021 – Feb 2023**

Syrian Electronic Payment Co. (SEP) — national e-payment gateway | Damascus, Syria

- Led a 3-person team running the infrastructure of Syria's national e-payment gateway, serving 18 banks and 30 billers at ~99%+ uptime.

Testing & Operation Engineer **Jun 2020 – Jun 2021**

Syrian Electronic Payment Co. (SEP) | Damascus, Syria

- Onboarded banks and billers onto the national payment system through technical sessions and go-live testing (SOAP web services, Linux, Oracle 12c).
- Ran EOD processing, applying reconciliation and settlement to payment transactions.

EDUCATION & LANGUAGES

BA in Electronic Engineering | Aleppo University | 2018

Arabic (Native) | English (Professional Working Proficiency)
